

EMS Electro Medical Systems is very pleased to invite you to experience the newest EMS technology during our workshop titled “GUIDED BIOFILM THERAPY – Clinical excellence in professional prophylaxis”.

GUIDED BIOFILM THERAPY is the systematic solution for dental biofilm management using state-of-the-art-technologies as AIR-FLOW® and Piezon®, proven by scientific and clinical evidences.

Dental hygienist (RDH) and consultant for the Swiss Dental Academy, Brigitte Schoeneich, will give you an insight in our new concept.

Following the lecture, you are invited to test our new devices to experience yourself the new way of prophylaxis by EMS. The hands on demonstration will be held in English, German and French.

In addition, you will have time for exciting discussions about learning, insights and personal practice accompanied by wine and snacks!

We are looking forward to welcoming you!

Please register and reserve your place [here](#).
